

About

I am a Software Developer, from Córdoba, Argentina, focused on Backend with 3 years of freelance experience creating web applications, pages and scalable architectures. Currently pursuing a degree in Information Systems Engineering and graduated as a Systems Analyst and Fullstack Developer. Experienced in building frontend and backend solutions using modern web technologies, both independently and in collaborative environments. Fast learner, self-taught, and passionate about innovation and teamwork.

Experience

2024 to 2025

Ordenar Online E-commerce - *Freelance Fullstack & Devops*

Built a responsive interface with ReactJS and TailwindCSS, and developed a layered REST API using NodeJS and ExpressJS with secure JWT authentication. Integrated MySQL for inventory, user data, and transaction management. Optimized frontend and backend performance, achieving fast load times and 100% accuracy in complex filtering and sorting queries.

2023 to 2026

Keluar, Valdemarion & Brazzalotto Landing Pages - *Freelance Frontend & Devops*

Designed and developed modern landing pages using JavaScript, Astro, TailwindCSS, and SASS, improving SEO and client reach. Collaborated with a designer and backend developer to optimize workflows. Added Google Analytics, mailing integrations, and GitHub Actions for VPS deployments. Rebranded the company's online presence, increasing client inquiries.
